DETAILED ACTION

Allowable Subject Matter

Claims 1-30 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for secure cellular telephone transmissions using a cellular telephone incapable of encrypting/decrypting the transmitted signals. Each of the independent claims recite the uniquely distinct features of "a computer system coupled between an external microphone and said conventional cellular telephone, wherein inputs into said conventional cellular telephone are received first by said computer system, said computer system being separate and apart from said conventional cellular telephone; encrypting, within said computer system, said input signal utilizing public key encryption to form an encrypted input signal; and transmitting said encrypted input signal utilizing said conventional cellular telephone, wherein cellular telephone transmissions from said conventional cellular telephone are secured." The closest prior art, Baugh et al (US 5,815,553) and Herlin et al (5,915,021), disclose a conventional system for secure voice communications in a telecommunications system fails to anticipate or render the above underlined sections obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
